REMARKS/ARGUMENTS

Reconsideration of this patent application is respectfully requested in view of the foregoing amendments and the following remarks.

Claims 1-3 have been canceled without prejudice. New claims 4-6 have been added.

The specification has been amended to insert the correct statutory citation for a priority claim.

Claims 1-3 have been rejected as indefinite under 35 U.S.C. § 112. Claims 1-3 have further been rejected under 35 U.S.C. § 103(a) as unpatentable over GB 2,265,918 in view of Blanchette, U.S. Patent No. 5,055,159. However, the Examiner has indicated that claims 1-3 would be allowable over the art of record if amended to include means plus function terminology.

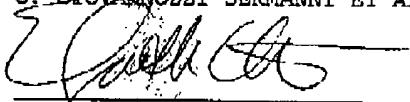

Claims 1-3 have been canceled without prejudice and new claims 4-6 have been added to more clearly define the invention. In particular, claims 4-6 have been written in means plus

function format.

The applicants believe that the remaining claims, 4 6, are written to overcome the rejections of the Examiner. Accordingly, applicants respectfully request early allowance of the remaining claims.

Respectfully submitted,
